

Oak London

Our latest addition of natural, textured oak floors

Twelve distinctive, muted colours all with slightly different textures, as diverse as our beloved city. The floors share a tactile quality: lightly to deeply brushed, some weathered, others in a reclaimed look - all with the same strong focus on quality craftsmanship and durability.

Our Old London collection offers plenty of character due to their undulating, gently brushed surfaces and shrunken knots. The wood has a time-worn yet elegant matt patina, a superb choice for a modern rustic interior.

Timber floors are easy to care for, please call us for further information on the best way to look after your floor.

Timber is a living material. A wooden floor, although no longer growing as part of a tree, is still very much part of its environment. As such, it responds to the light, temperature, humidity and wear to which it is exposed.

As the floor ages the colour of the wood will mellow and change. This is a natural process that occurs as the surface of the wood is exposed to oxygen in the air and to ultraviolet light from the sun. Painted surfaces, upholstery, furniture and rugs all undergo this same process over time.

After a number of years you may wish to have the floor surface sanded down and re-finished. You could then choose to re-oil the floor or have it stained first or even re-finished in lacquer.
