Oak Copper

Oak River

River and Copper are part of the Foundation range, our new collection of entry-level floors.

Copper: a rich, deep brown oak with a welcoming, rustic feel.

River: a light, neutral oak with white oil, highlighting the grain while keeping it warmth.

With a slimmer 13mm construction, it's optimized for efficient heat transfer with underfloor heating systems. Both floors celebrate rustic oak character, offering a planed finish.

To celebrate the launch, two colours are available at a special New Year price.

## Planks: £87.20 sqm ex vat & delivery

Size: 13mm x 240mm x random lengths

Duplex engineered

Rustic grade with filled knots up to 60mm allowed, micro bevel edge.

### Technical Specifications

<b>FIRE CLASSIFICATION</b>	EN: 13501: Dfl-S1
<b>THERMAL CONDUCTIVITY</b>	0.119-0.17 $\lambda$ W/mK
<b>HARDNESS</b>	4,982 N (Janka)

Timber floors are easy to care for, please call us for further information on the best way to look after your floor.

Timber is a living material. A wooden floor, although no longer growing as part of a tree, is still very much part of its environment. As such, it responds to the light, temperature, humidity and wear to which it is exposed.

As the floor ages the colour of the wood will mellow and change. This is a natural process that occurs as the surface of the wood is exposed to oxygen in the air and to ultraviolet light from the sun. Painted surfaces, upholstery, furniture and rugs all undergo this same process over time.

After a number of years you may wish to have the floor surface sanded down and re-finished. You could then choose to re-oil the floor or have it stained first or even re-finished in lacquer.
